

Preliminary Plan of the Training Seminar 2020
“Practical Use of Devices Series ST for Detection of Data Leakage Channels”

Day 1

Time	Activity	Event Content
9.00–9.10.	Seminar opening	Introductory word of the organizer-company.
9.10–12.00	Presentation of Series ST detection equipment	Devices from “ST” series - appearance background, new approach to the creation of multifunctional devices. Main differences of the new line of devices from previous models. Multifunctional detection device ST-500 - main characteristics, specifics, advantages. Wire Line Analyzer ST-301 - main characteristics, specifics, advantages. Combined search device ST-600 – designation, characteristics, specifics.
12.00-13.00	Lunch Break	
13.00-17.00	Practical work	Detection and localization of eavesdropping devices using detection equipment series ST (ST-500 Piranha , ST-301 SPIDER , ST-600 , ST-402 CAYMAN , ST-031M Piranha).

Day 2

Time	Activity	Event Content
9.00–12.00	Continuation of practical work	Detection and localization of eavesdropping devices using detection equipment series ST (ST-500 Piranha , ST-301 SPIDER , ST-600 , ST-402 CAYMAN , ST-031M Piranha).
12.00-13.00	Lunch Break	
13.00-16.00	Continuation of practical work	Detection and localization of eavesdropping devices using detection equipment series ST (ST-500 Piranha , ST-301 SPIDER , ST-600 , ST-402 CAYMAN , ST-031M Piranha).
16.00-17.00	Conclusion	Conclusion of practical work and result analysis.

Day 3

Time	Activity	Event content
9.00–17.00	Individual technical and commercial questions.
