## How to use

SEL ULTRADOCK is an audio jammer for the phone, used on the ultrasonic mixing technology and realized by the ultrasonic probe. The phone recording will be the white noise after using this jammer whether initiating the phone recorder or initiating the software recorder on the phone. SEL ULTRADOCK is Lightweight and portable, and it will protect your privacy from ear-dropping and tapping anywhere anytime. You can use it at workplace, business conference, home talk, and many other scenes to protect your privacy.

While jamming the phone recording, SEL ULTRADOCK will not affect other normal functions of the phone. SEL ULTRADOCK supports wireless Charging, at the max 15W.

Not installed the battery, SEL ULTRADOCK needs to connect to the power supply while working. After connecting to the power supply, the red charging indicator will light up. You can put the phone on the middle part of this jammer to realize anti-recording. The SEL ULTRADOCK, the speech protector will wireless charge the phone at the same time (the phone must support wireless charging).

A Short of beep can be heard after putting the phone on the jammer this shows that the jammer is working.

\* Connecting to the power supply and putting the phone On the middle part of the jammer, it will Automatically realize anti-recording and wireless-charging.

Function	Color	Mode
<b>Working Indicator</b>	Green indicator lights up	Working mode and initiate anti-recording
<b>Wireless Charging Indicator</b>	Blue indicator lights up	Initiate wireless charging
<b>Wireless Charging Indicator</b>	Red indicator lights up	Idle mode

\* Connected to the power supply, the wireless charging indicator of the SEL ULTRADOCK will light up in red.

## Specification

Item	Parameter
Working temperature	-10° C ~ 55° C
Wireless charging	10 W Max.
Entire consumption	< 25 W
Power supply	DC 12 V
Power adapter	12 V @ 3 A
Weight	219 g
Dimension	214 x 108 x 30.5 mm
Pack size	247.3 x 142.3 x 90.1 mm

## Notes

1. Please use the original power adapter to supply the jammer.
2. Please don't keep the jammer close to human body while working.
3. Please don't put any metal things on the surface of the jammer long-term to avoid the working fault or overheat.
4. Please don't keep the jammer exposed to the dusty and wet environment.
5. Please don't clean the jammer with any liquid; you can wipe the dust on the surface with a rag carefully.
6. Please don't store the jammer in a place over-heat or over-cold, and the right temperature is just – 10° C ~ 55° C. Otherwise, the service life will be affected.
7. Please don't keep the jammer exposed to high-temperature or heating equipment, such as heater, microwaves, oven, water-heater and etc.
8. Please don't drop the jammer into the fire.
9. Please don't topple, squeeze, or penetrate the jammer to avoid the damage.
10. Please don't dismantle the jammer.
